### MISSION:

At Diamond International School, we nurture international mindedness within our multi-lingual school community and are focused on the development of the whole child as a caring, open-minded and life-long learner

### VISION:

Our vision is to develop well rounded, confident and responsible individuals who aspire to achieve their full potential.

### About Us

DIS is a Candidate School for the Primary Years Program. Our school is pursuing authorization as an IB World School. This means our school shares the same common philosophy and believes in and is committed to a high-quality, challenging, and international education.

# Academics

#### Language

The need to Communicate is instinctive. The development of language is fundamental to that need to communicate: it supports and enhances our thinking and understanding

#### Mathematics

It's important that learners acquire mathematical understandings by constructing their own meaning through ever-increasing levels of abstraction, starting with exploring their own personal experiences, understandings, and knowledge.

#### PSPE

At DIS, personal, social and physical education (PSPE) is concerned with the individual's well-being through the promotion and development of concepts, knowledge, attitudes and skill that contribute to this well-being

#### Social Studies

At DIS, Social Studies is viewed as the study of people in relation to their past, present, and future, environment and society. Social studies encourage curiosity and develop an understanding of a rapidly changing world.

#### Science

The need to Communicate is instinctive. The development of language is fundamental to that need to communicate: it supports and enhances our thinking and understanding

#### The Arts

They are a powerful mode of communication through which students explore and contract a sense of self and develop an understanding of the world around them

**The DIS framework focuses on the development of the whole child as an inquirer, both at school and beyond. Informed by research into how students learn, how educators teach, and the principles and practice of effective assessment, the program places a powerful emphasis on inquiry-based learning.**

## Why Choose Us?

The goal of DIS and our educators is to provide an affordable, world-class education. We provide a conducive learning environment where we can nurture international mindedness focusing on developing the whole child as a caring, open-minded, and lifelong learner. Here at DIS, we focus on the benefits of learning how to learn rather than specific content. Our inquiry-based curriculum inspires and motivates students through their own interests encouraging them to research and find the answers to their own well-thought-out questions.
